PROJECTS

Template Designing

- Using all properties in HTML,i have designed an predefined template on the concept of web software development.This is the task that was given by our web development trainers during the internship period.

Server and Project Portfolio management

- To maintain the detailed information about the servers and the projects that are under maintenance.As it was a group project the front end part was designed by me.As we have utilized a predefined template for the development the project.

- Technologies used for frontend development are html,css,reactjs and for backend mongodb and nodejs
